

E-Commerce Solutions

E-commerce has become a more and more important channel of distribution, especially for the Consumer Electronics Industry. In 2006, e-commerce was growing at a rate of about 35% with a total turnover of over € 100 bn in Europe. To be successful in the e-commerce channel it is essential to have an integrated solution for customer service, IT, logistics and financial services because these fields often generate the highest costs.

arvato digital services offers you a complete and integrated e-commerce solution. We develop your online shop system (frontend & backend) and manage the end-to-end fulfillment process to your customer (B2B, B2C) – whether you want to distribute your products physically or via a digital download.
